Fast vertical  
storage lift with  
high performance  
dual lift

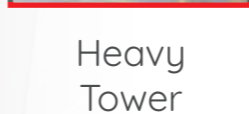

Vertical lift that can hold 200% of the stored material on 160% of the surface

Reliable vertical  
storage lift  
with proven  
performance

Fully automated  
solution of vertical  
storage lift  
and conveyors

Vertical storage system designed for storing heavy bulky material.

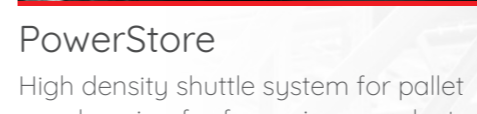

## VertiNode Ai function

- 
- Management of materials, locations, warehouses movements, inventory and reporting
  - Multiplatform (PC, mac, mobile applications, web access)
  - Graphically user friendly
  - Fully or partially in the cloud, or even only local instance
  - Modern REST and other connections for communication with ERP and WMS systems
  - Open API
  - Graphical visualization of shift performance for motivation directly on the display on the warehouse area
  - Communication with lots of peripherals – pick-to-light systems, printers
  - Manager dashboard with instant warehouse operation indicators
  - Dashboard for equipment and software status
  - Personalizable reports and prints
  - Remote monitoring from anywhere
  - Ability to manage storage systems of other suppliers
  - Artificial intelligence manages and optimizes operational performance, material storage and order picking

153

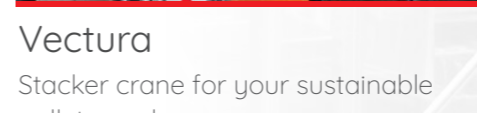

heavy loads & pallets

## PowerStore

High density shuttle system for pallet warehousing for few unique products at high throughput.

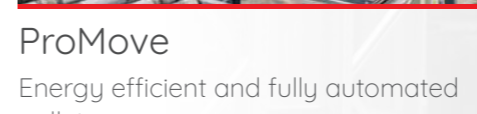

- Up to -30°C storage temperature
- Fits easy into any building shape

Vectura

Stacker crane for your sustainable pallet warehouse.

- 20% lower energy consumption
- Highly tailored for multiple configurations

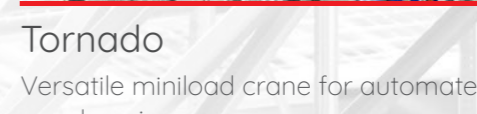

## ProMove

Energy efficient and fully automated  
pallet conveyor.

- Plug & Play: factory precommissioned for fast installation
- Minimized downtime, reduced wear

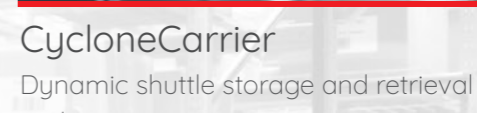

## light goods and parcels

## Tornado

Versatile miniload crane for automated warehousing.

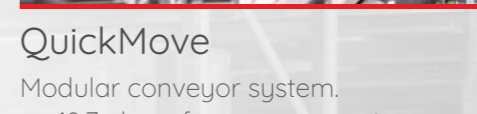

- Versatile crane to store a wide range of products up to 250 kg
- Durable at high availability

## CycloneCarrier

Dynamic shuttle storage and retrieval system.

- Up to 1,000 cases or 2,000 totes per hour
- Solid solution, easy to maintain

## QuickMove

Modular conveyor system.

- 18.7+ km of conveyor running worldwide

Improve your warehouse storage retrieval operations and save up to 50%-80% on labor costs with our forklift robots designed for 360 degrees obstacle avoidance and excellent operational safety

The image shows a white, box-shaped autonomous mobile robot (AMR) with a blue base, navigating through a warehouse aisle. It is carrying a stack of grey storage bins. Blue arrows on the floor indicate its path and turning capabilities. The robot is positioned next to a metal shelving unit.

Improve your warehouse moving efficiency by over 50% with our moving robots inbuilt with QR code navigation and laser SLAM technology

A futuristic mobile robot with a white cylindrical base and a black tray. The robot has blue LED lights on its base and is carrying a black tray with a white box on it. It is positioned in a modern, minimalist interior with large windows and a dark floor.

Improve your warehouse sorting efficiency nearly to 10x that of traditional sorting methods with our highly automated and versatile sorting robots

A 3D rendering of a P Series mobile robot in a simulated warehouse environment. The robot is a tall, grey, rectangular unit with a base that glows with blue and red lights. It is positioned on a dark floor, surrounded by various warehouse structures like shelving units and conveyor belts. In the background, several human figures are visible, suggesting a collaborative work environment.

Improve your warehouse picking efficiency by over 200% with our innovative “Goods-to-Person” picking solutions

Improve your warehouse picking efficiency by 2 to 3 times with our RoboShuttle robots which account for your business and operational needs with their fast ROI and flexible implementation structure

Improve your warehouse picking efficiency with our collaborative picking robots and save up to 35-50% on labor costs
